

# TRAFFICALM™ SA-FR

Emergency Vehicle Warning System

## Working to Improve Unabated Deployment

SA-FR is a sign enhancement device utilized by Fire Stations to engage and forewarn drivers prior to the First Responders call-to-action and departure for an emergency response. The device initiates an immediate activation of LED enhanced flashers permanently mounted and networked together on Fixed Warning Signs at or near the ingress / egress to the Fire Station.

The activated system prompts an immediate roadside alert with a visible “Motorist Call to Action” to Yield during First Responder deployment and return to the Fire Station.

### SA-FR Activation Options Available:

- Portable Remote
- Wall-Mounted Activator
- 24/7 Flashing

- ◆ SA-FR operates within a Wireless Network
- ◆ Easy Installation
